REQUEST 35 U.S.C. § 122(B)(2)(B)(ii)**

Dear Sir:

The above-captioned application was filed on February 9, 2004 along with a non-publication request. The above captioned application claims priority to U.S. Provisional Application Serial Nos. 60/445,788 (the "788 provisional application") and 60/445,881 (the "881 provisional application"), both filed on February 7, 2003.

On February 6, 2004, the Applicants filed a PCT application, serial no. PCT/US2004/003504 (also referred to by serial no. PCT/IB2004/000720) (the "PCT application") and a corresponding U.S. Patent Application No. 10/773,488 (the "488 application"), both based on the '788 and '881 provisional applications. The '488 application was allowed to publish in the U.S.

The above captioned patent application and the PCT application share a substantially similar disclosure based on the '788 and '881 provisional applications

however, the above captioned application and the PCT application are not directly related and do not claim the same subject matter. Applicants' attorney believed that, at the time the above captioned application was filed, the term "invention", as it appears in 35 U.S.C. § 122(b)(2)(B)(i), and the phrase "directed to the invention", as it appears in 35 U.S.C. § 122(b)(2)(B)(iii), referred to "the claimed invention" of the above captioned application rather than the entire disclosure. Therefore, Applicants' attorney believed that the invention disclosed in the above-captioned application was not the subject of the PCT patent application.

Accordingly, Applicants' attorney believed that Applicant had complied with 35 U.S.C. § 122(b)(2)(B)(i) and that publication was not necessary. Therefore, the above captioned patent application was filed with a request not to publish and this request was not rescinded within 45 days of the filing of the PCT application as required by 35 U.S.C. § 122(b)(2)(B)(iii).

However, Applicants' attorney has since learned that the PTO interprets the above laws differently based on the entirety of the disclosures of the patent applications at issue and that, in fact, the above captioned application should have been published. Accordingly, Applicants' attorney's certification on the request for non-publication may be improper under 37 C.F.R. § 10.18(b). This improper certification arose through error and without deceptive intent.

Accordingly, the Applicants are filing herewith a Rescission of Previous Non-Publication Request 35 U.S.C. § 122(b)(2)(B)(ii) and, if applicable, Notice of Foreign Filing (35 U.S.C. 122(b)(2)(B)(iii)).

As the improper certification was made subsequent to a foreign filing, it is our understanding that the above captioned application is not abandoned pursuant to 35 U.S.C. § 122(b)(2)(B)(iii).

Respectfully submitted,

James L. Katz
